OUTDOOR LIVING SYSTEMS
Contemporary outdoor living

A solution for every outside space

WWW.BASKOUTDOORLIVING.CO.NZ

BASK OUTDOOR LIVING SYSTEMS are custom-designed and manufactured in New Zealand for every installation.

No two builds are the same, and because of that, we enjoy finding out what your dream outdoor room would look like. Combining the modern vision of a pergola with sliding panels and weather protection creates a seamless transition between indoor and outdoor spaces.

Are you looking to extend your living area outside further into cooler months, or do you want to create an area protected from the rain and wind? Is this an occasional space, or will it be a place to spend large amounts of relaxation or entertaining time, or is this another way to add value to your property?

A Louvre Roof to fit every space

Whatever you are looking to achieve with your outdoor room, the custom-designed and built versatility of a Bask Outdoor Living System will meet the needs of even the most discerning homeowner. From freestanding to fully integrated, SunFold® and SunPivot® louvre roofs can be configured as you imagine, with louvre blades opening and closing to suit your preferences and the weather.

SunFold® and SunPivot® louvre roofs have been designed in New Zealand with our local weather conditions in mind. Here are six key reasons to choose us:

Reliability

To ensure the utmost reliability and minimal maintenance, we have selected only the best German linear and Italian tubular motors to operate our louvre systems

EP Technology

To provide a more weather-resistant roof seal, our unique louvre blades use End Pivot (EP) technology to sit only a few centimetres above the gutter when closed

Integrated Gutter

To reduce rainwater leaks and provide a clean, seamless look, we have integrated the gutter into the outer beam, which also provides additional structural strength

Gutter Box

We avoid ugly silicone gutter corner joints with our exclusive solid aluminium gutter box and cover plates

Hidden Pipes

To provide an architectural finish when the design includes a support post, we run internal drainpipes down inside the post

Screen System

To increase the functionality of your louvre roof, we have integrated (into the outer beam) an optional outdoor blind system

Add shelter to your home with a fixed pergola roof

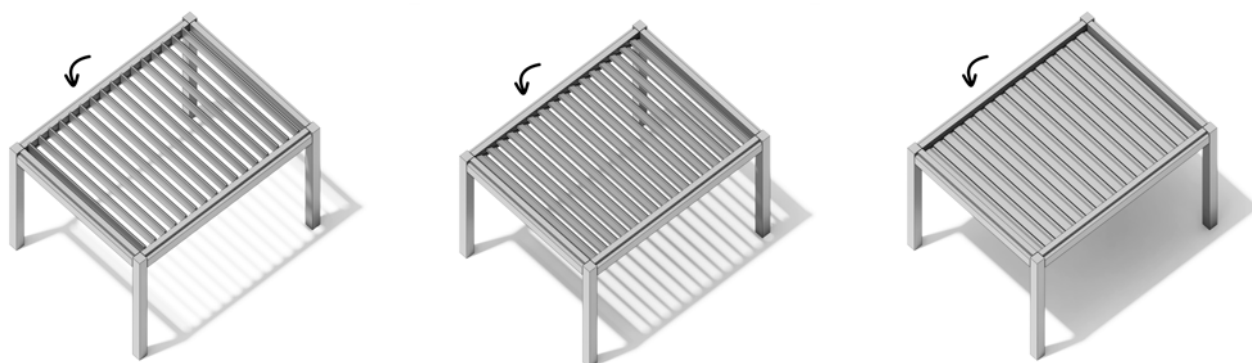

Proudly designed and custom-built in New Zealand, the VelaSun® fixed pergola is made to withstand our unique climate. Tailored to your home for a perfect fit, it will add timeless style and all-weather shelter, turning an outdoor space into a year-round protected area. Offering contemporary, low-maintenance, all-weather protection, VelaSun® delivers long-lasting durability with a modern finish. Enjoy more time outside, whether a morning coffee or social gatherings, with a fixed roof that will blend beautifully with your home. With glass and polycarbonate roof panel options, flexible mounting, and customised sizing, VelaSun® will integrate seamlessly into new or existing structures.

SUNPIVOT®

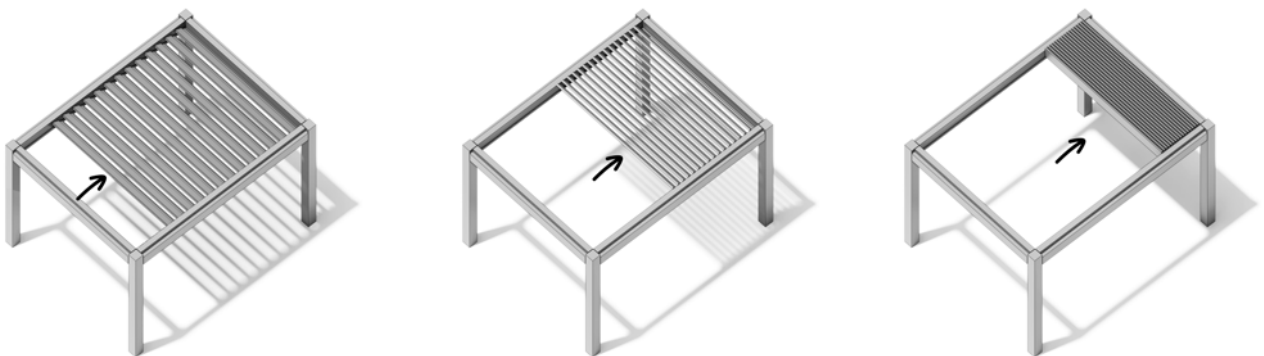

Representing the next generation of our popular, tried-and-tested pivoting louvre roof, SunPivot® brings all the great features of our original system and improves on the design to create a sensational outdoor living room experience that will become an essential part of your lifestyle.

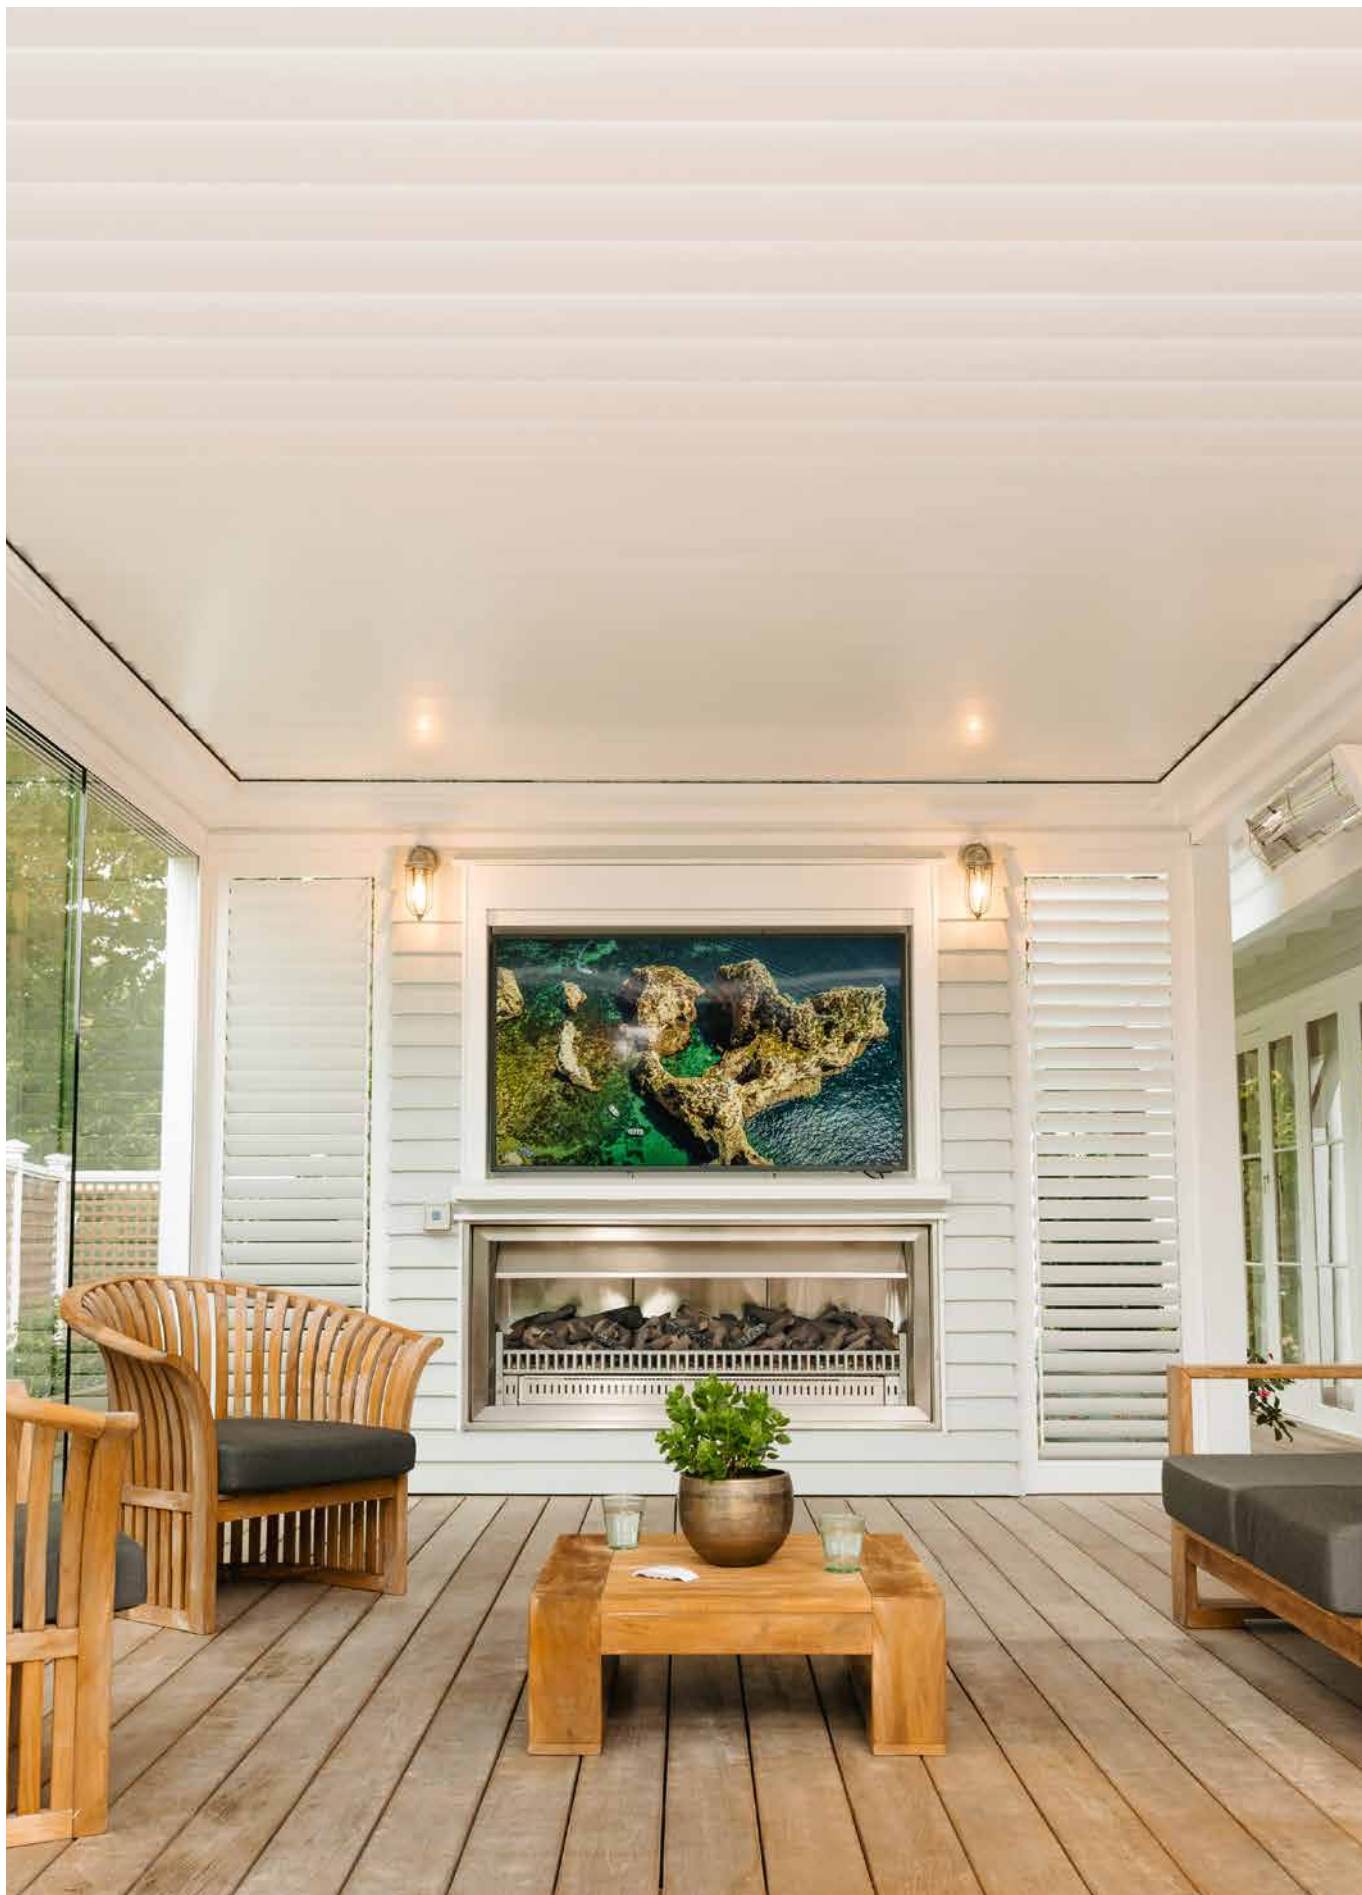

SUNFOLD®

Soak up the day's rays or the evening glow uninterrupted with SunFold®, our New Zealand-designed Retracting and Folding louvre roof. Fully closed, partially open and pivoted, or fully retracted and stacked to one side, SunFold® will provide the ultimate flexibility and control to your outdoor living space.

SUNFOLD® RETRACTING & FOLDING LOUVRE ROOF

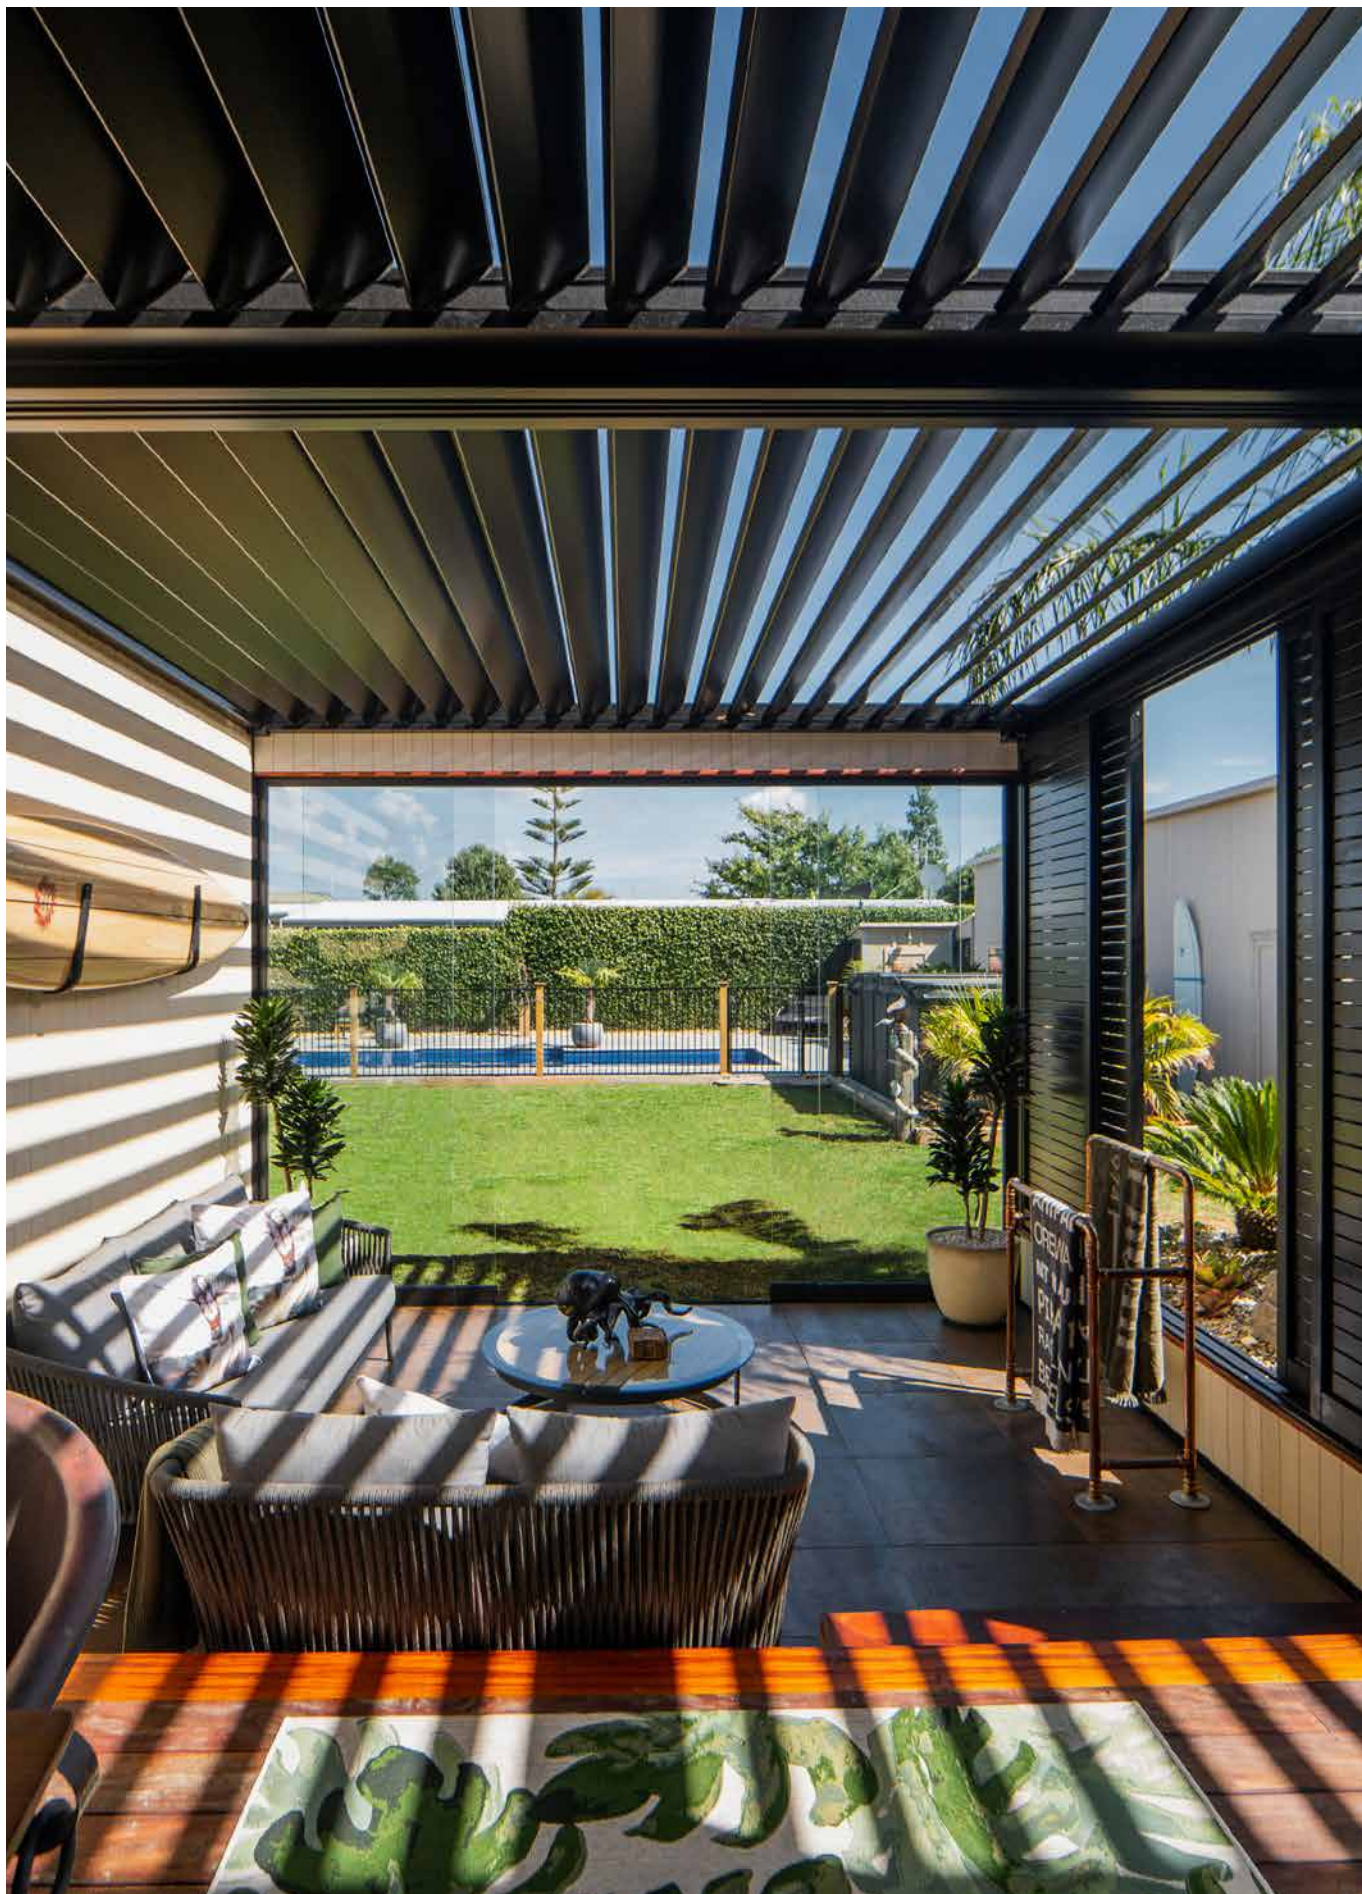

Set the ultimate scene with a SunFold® louvre roof.

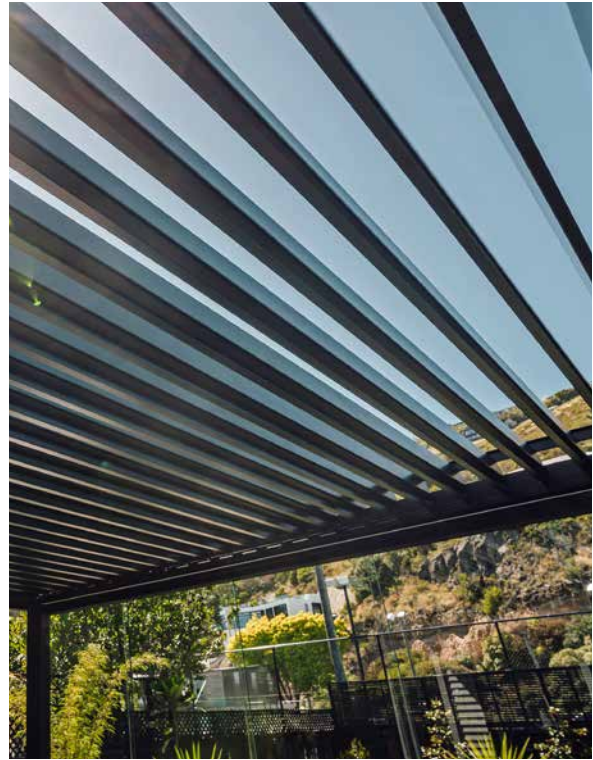

Move from indoors to outdoors without ever leaving your seat. The SunFold® Retracting and Folding louvre roof will transform your outdoor entertainment space from a cosy and protected environment to a warm and vibrant area, at the touch of a button. Retract the roof of your outdoor room by up to 75% of the total roof area, letting in sunlight and warmth, partially tilt and retract the louvres to control light and airflow coming through, or keep the louvre tightly closed to deflect the worst weather New Zealand can throw at you.

Features and Benefits

- SunFold® Louvre Roofs retract and fold back to allow 75% of your covered area with open sky at the click of a button
- Louvre blades pivot as the roof opens for ultimate environmental control
- Leave the roof closed with confidence that your outdoor furniture will stay dry, and water will be removed through hidden drainage
- Bottom pivoting louvre blades fit tightly against the gutter framing when closed, reducing most water splash from the gutters
- Integrate Solarzip® outdoor blinds to help keep warmth in or light out
- For the ultimate in outdoor rooms, integrate Glaslide® glass sliding doors or Louvrelite® 88 Series aluminium shutters to make your outdoor room complete

Choose between Freestanding, Wall Mounted, or Fully Integrated series louvre roofs for a unique customised design that suits your home.

SUNPIVOT® PIVOTING LOUVRE ROOF

Bring elegance to your outdoor living area.

With blades that can pivot up to 90 degrees, the SunPivot® louvre roof enables incredible control of the elements. Designed to keep you dry in wet weather and bathed in sunlight when it's shining, SunPivot® will bring style and elegance to any outdoor entertainment area, allowing enjoyment of the outdoors all year round.

Our most popular louvre roof system allows you to adapt to New Zealand's changeable weather, whether relaxing or entertaining guests.

Features and Benefits

- SunPivot® blades rotate up to 90 degrees, or anywhere in between, with the touch of a button
- Hidden drainage removes water when it's raining to help keep your entertainment area dry
- End pivoting louvres help reduce water splash from the gutters when closed
- Integrate Solarzip® outdoor blinds to help keep warmth in or light out
- For the ultimate in outdoor rooms, install Glaslide® glass sliding panels or Louvrelite® 88 Series aluminium shutters to make your outdoor room complete

Choose between Freestanding, Wall Mounted, or Fully Integrated series louvre roofs for a unique customised design that suits your home.

Both **SunFold®** and **SunPivot®** louvre roofs come with a range of features and additional add-ons that help create a bespoke entertainment area offering protection from the elements and allowing enjoyment of the outdoors, whatever the season.

The louvres can be adjusted to control light and provide shade not only under the roof, but also for adjacent rooms.

FREESTANDING

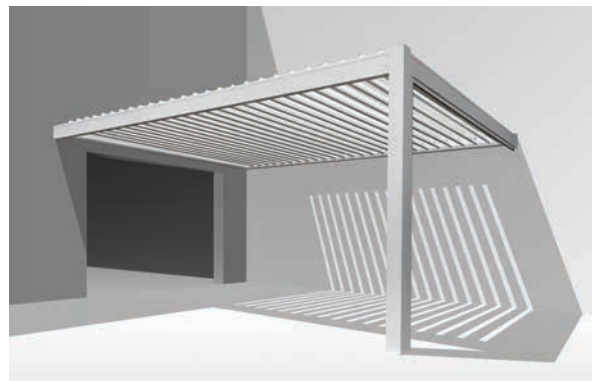

Completely standalone, a freestanding louvre roof is great to create separate environments away from the home, anywhere in the garden. This is also a great option if attaching or integrating into an existing home is not possible

FREESTANDING

WALL MOUNTED

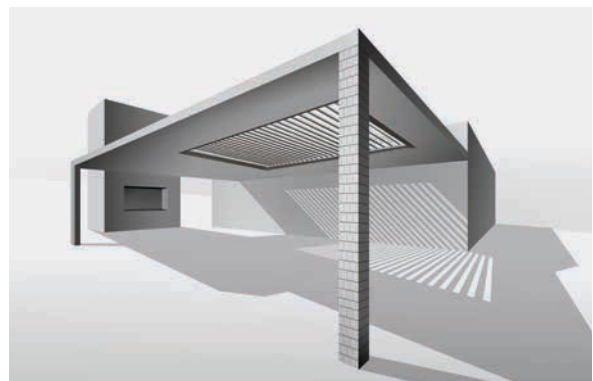

A great solution for extending your living space into your outdoors. Attached to the house along one or more sides, the wall mounted series helps create a seamless transition to outdoor living

WALL MOUNTED

INTEGRATED

Made to blend beautifully into your home. Our louvre roofs can be fully integrated into a larger roof design or structure to create a stunning indoor-outdoor flow that will have your guests questioning if they are inside or out

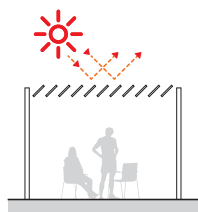

INTEGRATED

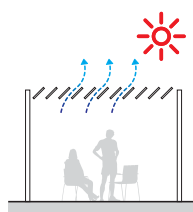

Rain Protection

When closed, the roof protects you and your furniture from passing showers

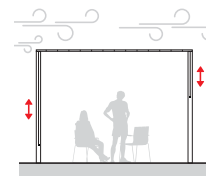

Temperature Control

Manage midday temperatures to enjoy outdoor living during the hottest part of the day

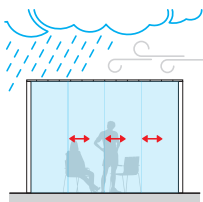

Ventilation

Allow air to flow and prevent heat build-up and the "greenhouse effect" of a conservatory

Wind Control

Use outdoor blinds or aluminium screens to provide some shelter from prevailing winds

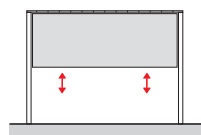

All Weather Protection

The addition of Glaslide® glass sliding doors will help protect you and your outdoor furniture from most weather the environment can throw at you. Spend all year enjoying the outdoors

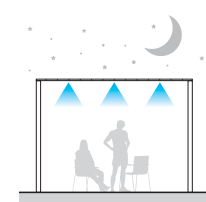

Rain Sensors

Optional sensors detect the weather conditions, and your louvre roof will close automatically

Privacy Control

Screens add a level of privacy to outdoor living. Extra privacy can be created using outdoor blinds or aluminium screens. On sunny days, these can be adjusted so that the existing character of your patio remains

Integrated Lighting

LED lighting can be fitted into the outer frame, creating an intimate atmosphere and ambience suitable for the situation

Dulux® Powder Coat Colour Matched to Décor

Each outdoor living system is powder coated from a wide range of finishes from the Dulux® range and allows the system to match or complement the existing fixtures and fittings. Our powder coating is done right here in New Zealand at a state-of-the-art Dulux® accredited powder coating facility.

Remote Control

Opening and closing your louvre roof and screens is easy via the touch of a button on one integrated remote control.

VELASUN® FIXED CANOPY ROOF SYSTEM

The ideal system to add an outdoor shelter to your home.

The elegant aluminium pergola system is designed to shelter your outdoor entertainment area from New Zealand's harsh sun and rain, maximising your ability to enjoy the outdoors in perfect comfort. VelaSun can be customised to suit your existing home, with soffit or wall mounting options. With a maximum span of 4.8 metres* and a length of up to 12 metres*, it provides generous coverage for outdoor areas. Available with glass or polycarbonate infill cover to protect from the elements, and allow enjoyment of your outdoor space year-round, or roofless with no infill.

The UV-resistant 4mm polycarbonate, with a gentle curve or flat glass panels, blocks damaging sun from you and your family, along with your contents. The versatile design is custom-made in NZ to meet every requirement, with options for sizing, colours, inbuilt lighting, drop-down screens and other add-ons to help create the perfect environment at home.

Features and Benefits

- Three roof infill options: Polycarbonate, Toughened and Toughened Laminated Glass or Roofless (no infill)
- Custom built in NZ
- Robust aluminium frame: Built to last, ensuring long-term enjoyment with minimal maintenance
- The frame is available powder coated from the wide range of Dulux colours to match the aesthetic of your home
- UV-resistant Polycarbonate or Glass for sun protection
- Polycarbonate panel width of 800mm
- Glass panel nominal widths of 600mm for two different designs
- Easy installation for new builds and retrofitting to existing buildings
- Soffit or Wall Fixed configuration available
- Solarzip® drop-down outdoor blinds can be added*

* Talk with your local Bask® about available options.

SOLARZIP® DROPDOWN AWNINGS

Integrate into the louvre roof beam or add to VelaSun® for a comfortable environment.

Solarzip® is a vertical outdoor blind that shelters outdoor living areas from moderate winds and sun, while retaining the view and access to natural light. Installing a Solarzip® outdoor blind will extend the use you get out of your louvre roof or fixed roof, by adding side protection from the elements.

Manual spring operation or automated, using the same remote as the louvre roof, adjust Solarzip® to suit the conditions, without needing to get out of your seat.

A special high-temperature, welded side zip allows the awning fabric to be encapsulated within aluminium side tracks that blend seamlessly with your louvre roof. The patented Solarzip® technology absorbs fabric movement to help prevent the fabric from tearing away from the guides.

Features and Benefits

- Integrated into the SunPivot® and SunFold® louvre roof beams
- Can be added to VelaSun®
- Automated for easy control or spring-operated manual operation
- Strong welded side zips keep the blind fabric within the guides and prevent tearing
- Weighted drop bar keeps the awning stable in wind and rain
- Maximum width 4500mm
- Maximum drop 3000mm
- Fabric: A wide range of colours and options available

GLASLIDE® FRAMELESS OUTDOOR SLIDING GLASS PANELS

Glaslide® creates an elegant, protected outdoor room.

Outdoor spaces are increasingly being designed for greater flexibility and variety of uses that can be utilised for year-round enjoyment. Introducing frameless sliding glass panels into an area creates a unique outdoor space with the functionality of being indoors. The Glaslide® system comes in various glass thicknesses and sizes suitable for different wind zones, helping to keep the weather out. Easy to open and slide away through its foot-operated locks, they can transform your outdoor room into a light and breezy entertainment area.

Features and Benefits

- Double and triple track options
- Two, three, four, and six glass panel configurations
- Low bottom track, just 22mm
- Opening of glazing space up to 80%
- Foot-operated interconnecting locking system
- Maximum panel weight 120 kgs

LOUVRELITE® 88 SERIES SHUTTERS

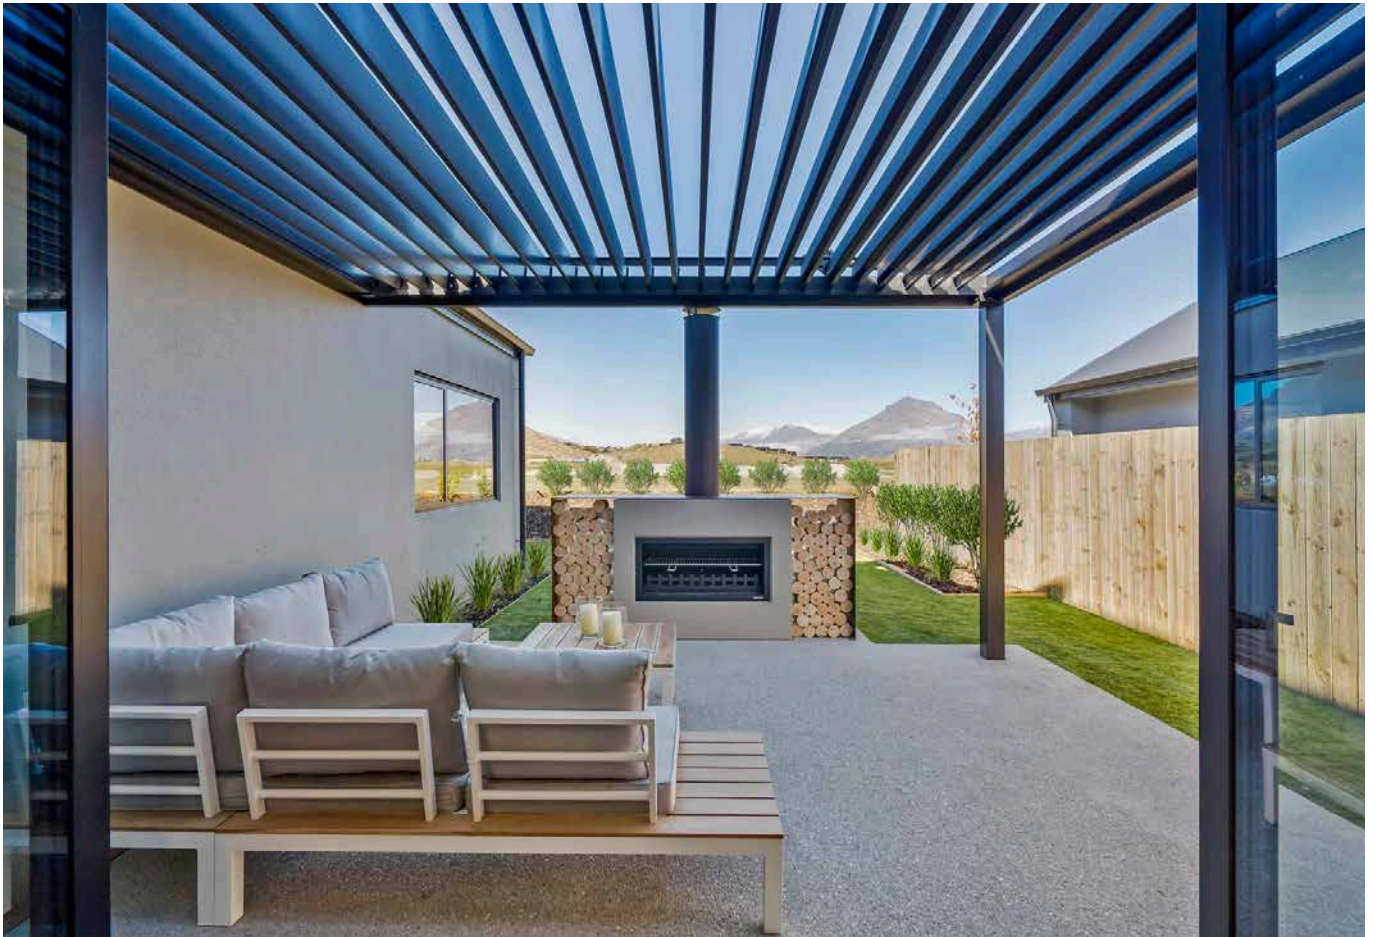

Creating comfortable outdoor environments.

The Louvrelite® 88 Series sliding or fixed panel shutter system provides luxurious appeal and superb environmental control in one.

An ideal system for the outdoor entertainment area, it allows for the control of airflow and light by tilting the louvre blades or sliding entire panels to suit the situation.

Features and Benefits

- Architecturally designed for New Zealand environments
- Made with aluminium and stainless steel for longevity and minimal ongoing maintenance
- Designed for shading outdoor areas, whilst letting in light and breeze
- Powder coated in New Zealand in a choice of modern colours
- Custom made shutters up to max 1500 mm wide x 2700mm high
- One, two, three or four door shutters configurations available
- Fixed or Sliding options
