WWW.BASKOUTDOORLIVINGSYSTEMS.CO.NZ

BASK OUTDOOR LIVING SYSTEMS are designed and manufactured in New Zealand uniquely for every installation.

No two builds are the same, and because of that, we like to find out what your dream outdoor room looks like.

Combining the modern vision of a pergola, with sliding panels and weather protection creates a seamless transition between the indoor and outdoor space.

Are you looking to extend your living area outside further into cooler months? Are you looking to create an area safe from rain and wind? Is this an occasional space or somewhere you will be spending a lot of your relaxation or cooking time? Or is this another way you want to add value to your property?

A Solution for every space

Whatever it is that you're trying to achieve with your outdoor room, the custom designed versatility of a Bask Outdoor Living System will meet the needs of the most discerning person.

From freestanding to fully integrated, the SunFold® and SunPivot® louvre roofs can be configured just how you dream, with the louvres opening and closing to suit your desires and the local weather.

SIX KEY FEATURES

Bask Outdoor Living Systems have been designed in New Zealand with New Zealand weather conditions in mind. There are six key reasons to choose our brand:

Reliability

To ensure utmost reliability and minimal maintenance, we have selected only the best German linear motor and Italian tubular motor to operate our louvre systems.

EP Technology

To provide a more weather resistant roof seal, our unique louvre blades use End Pivot (EP) technology to sit only a few centimetres above the gutter when closed.

Integrated Gutter

To reduce rainwater leaks and provide a clean, seamless look, we have integrated the gutter into the outer beam, which also provides additional structural strength.

Gutter Box

We avoid ugly silicone gutter corner joints with our exclusive solid aluminium gutter box and cover plates.

Hidden Pipes

To provide an architectural finish, when the design includes a support post, we run gutter drain pipes inside the post.

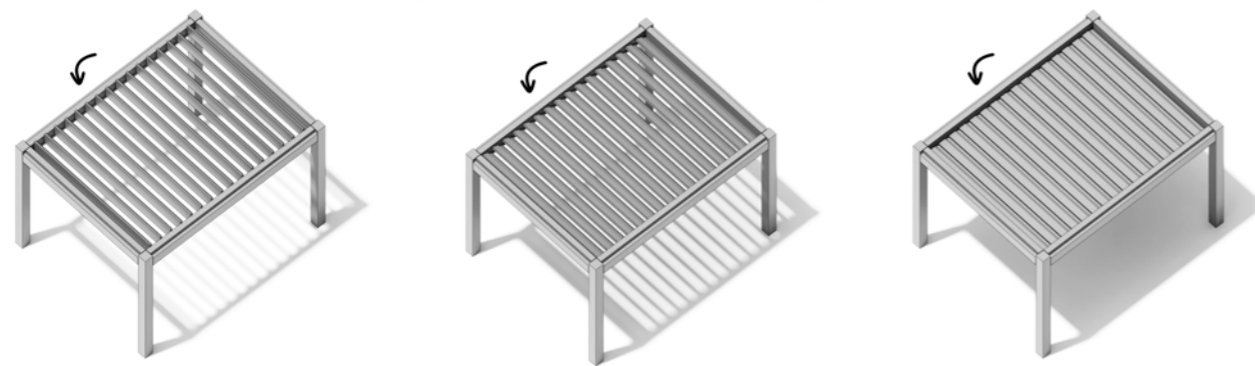

Screen System

To increase functionality of your louvre roof we have integrated (into the outer beam) an optional drop down screen system.

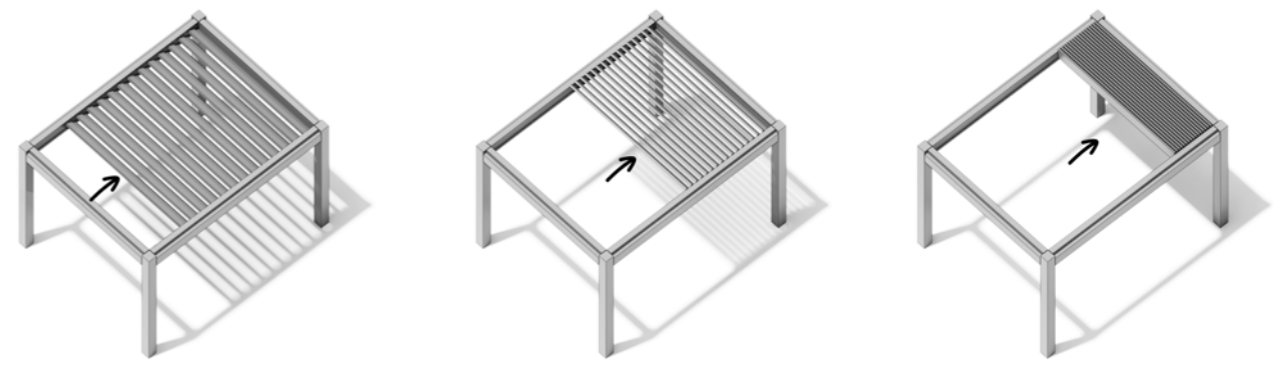

SUNPIVOT®

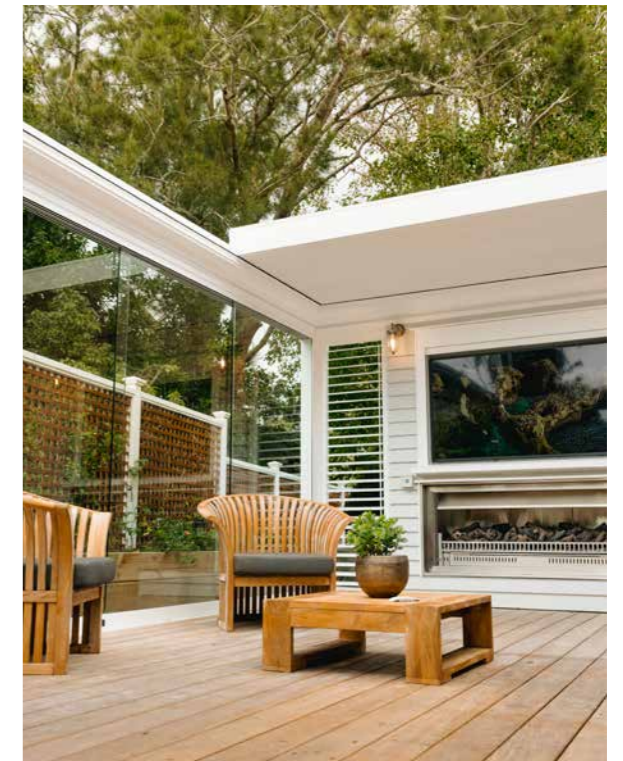

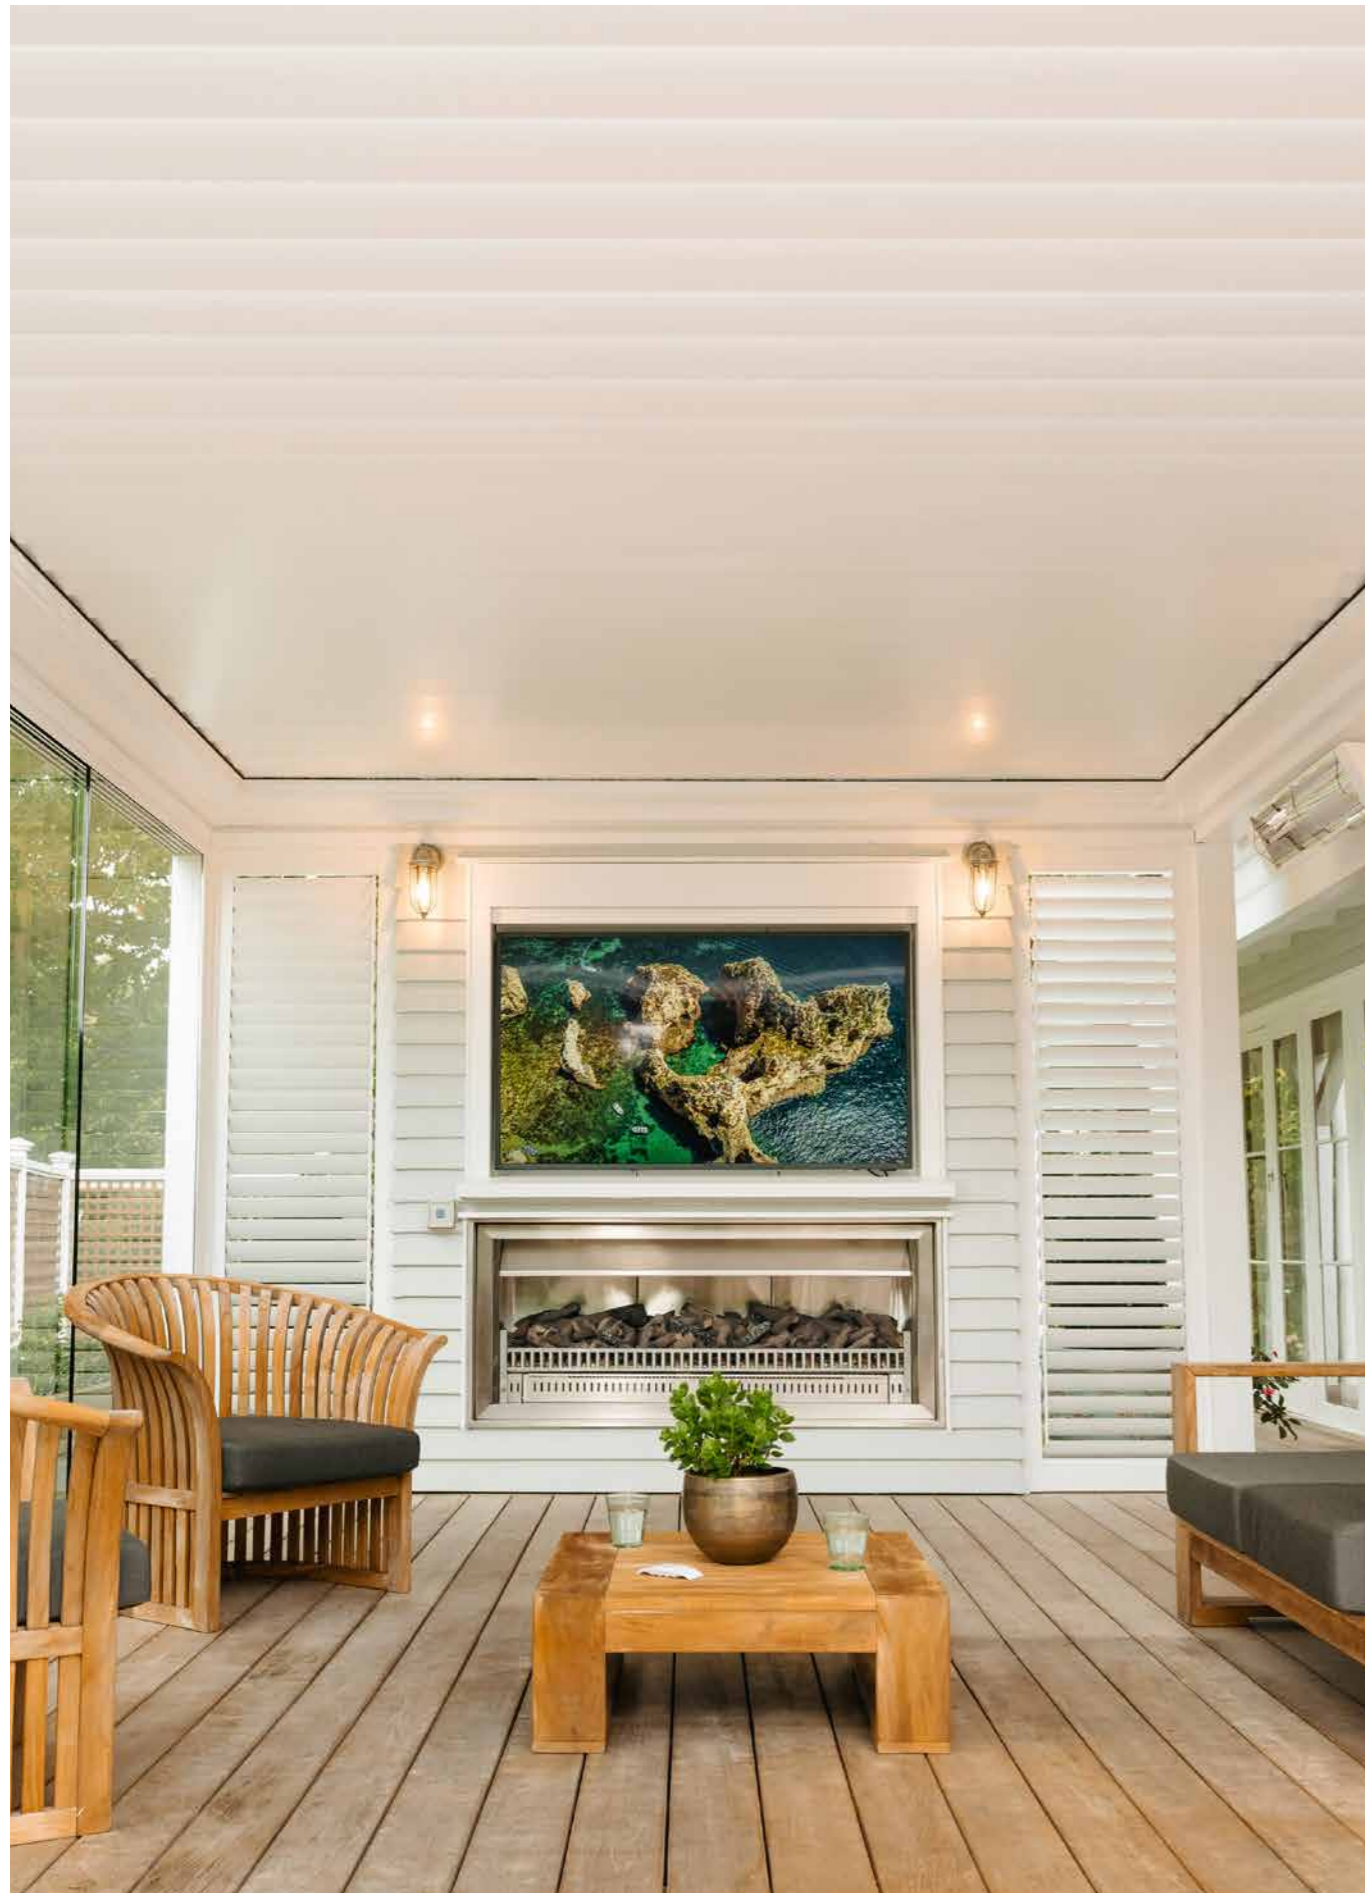

The next generation of our tried and tested pivoting louvre roof. The SunPivot® louvre roof brings all the features of our original pivoting louvre system and improves on the design to create a sensational outdoor living room experience that will become an essential part of your lifestyle.

SUNFOLD®

Soak up the day's rays or the evening glow uninterrupted with SunFold®, our New Zealand designed Retracting and Folding Louvre Roof. Fully closed, partially open and pivoted, or fully retracted and stacked to one side, SunFold® provides the ultimate flexibility and control to your outdoor living space.

SUNFOLD® RETRACTING & FOLDING LOUVRE ROOF

Set the ultimate scene with a SunFold® louvre roof.

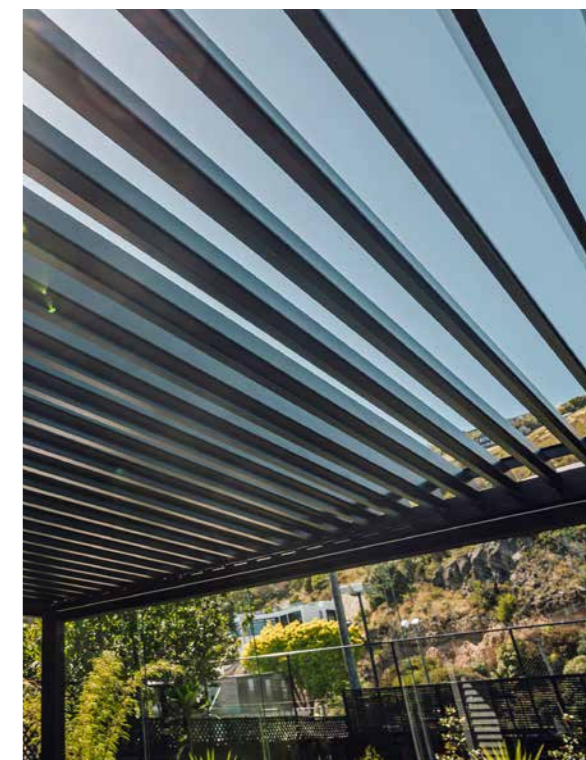

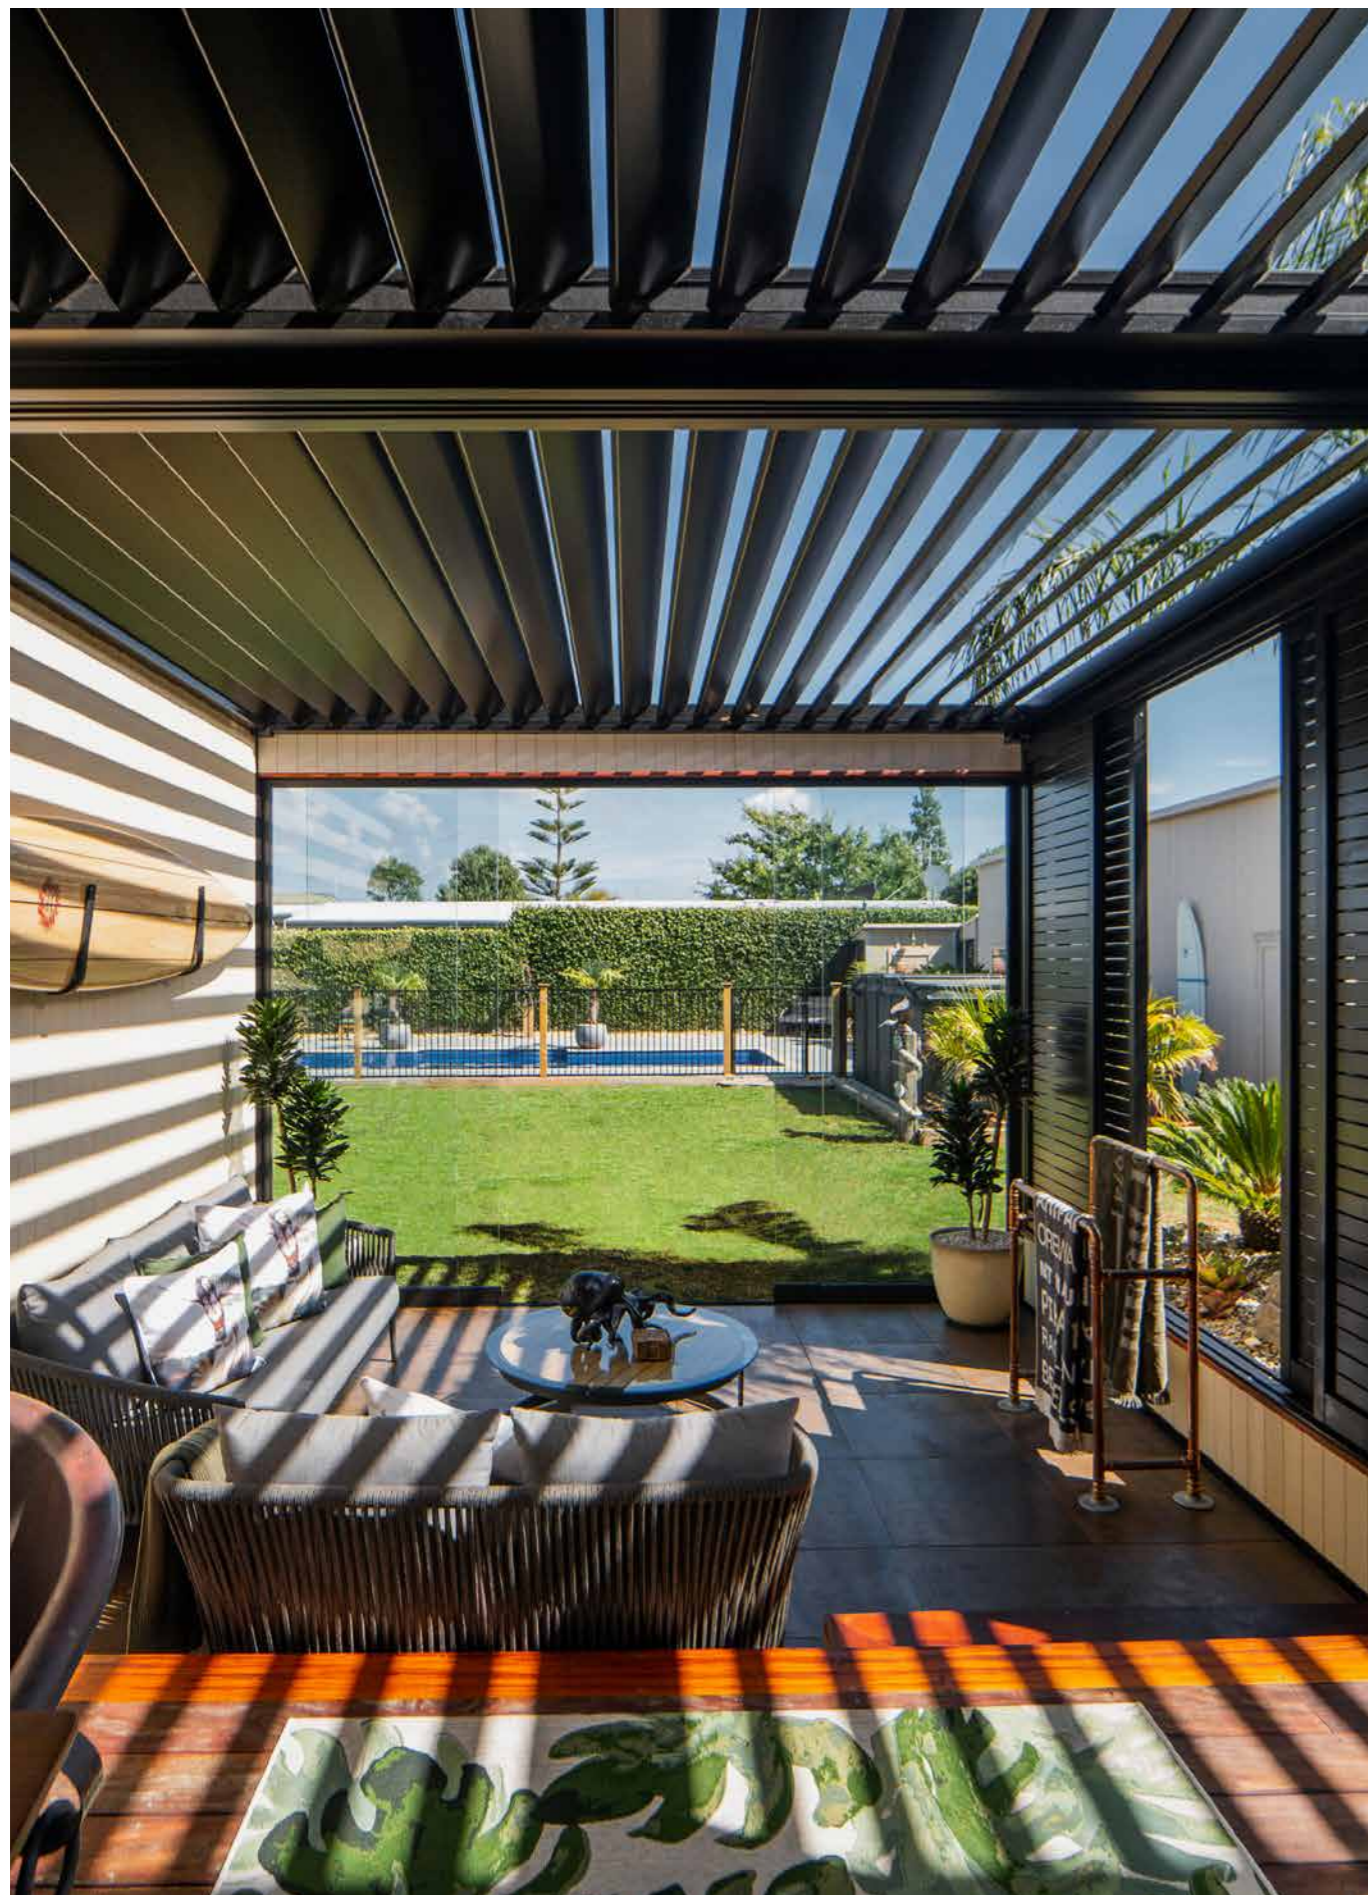

Move from indoors to outdoors without ever leaving your seat. The SunFold® Retracting and Folding Louvre Roof transforms your entertainment area from a cosy and protected environment, to a warm and vibrant outdoor area with the click of a button.

Retract the roof of your outdoor room by up to 75% leaving sunlight to cover the area in warmth, partially tilt and retract the louvres to control light and airflow coming through, or keep the louvre tightly closed to deflect the worst weather New Zealand can throw at you.

Features and Benefits

- SunFold® Louvre Roofs retract and fold back to allow 75% of your covered area uninterrupted sky with the click of a button
- Louvre blades pivot as the roof opens for ultimate environmental control
- Leave the roof closed with confidence that your outdoor furniture will stay dry and water will be removed in hidden drainage
- Bottom pivoting louvre blades fit tightly against the gutter framing when closed, reducing most water splash from the gutters
- Integrate Solarzip™ dropdown awnings to help keep warmth in or light out
- For the ultimate in outdoor rooms, integrate Glaslide® Glass Sliding Doors or Louvelite® 88 Series Shutters to make your outdoor room complete

Choose between Freestanding, Wall Mount, or Fully Integrated series roofs for a truly custom design that suits your home.

SUNPIVOT® PIVOTING LOUVRE ROOF

Bring elegance to your outdoor living area.

With louvres that can pivot up to 90 degrees, the SunPivot® Pivoting Louvre Roof gives you incredible control of the elements. Designed to keep you dry in wet weather and bathing in sunlight when it's shining, the SunPivot® Louvre Roof will bring style and elegance to any outdoor entertainment area.

Enjoy the outdoors all year round. Our most popular Louvre Roof system allows you to adapt with New Zealand's ever changing weather, while relaxing or entertaining guests.

Features and Benefits

- SunPivot® louvres rotate up to 90 degrees, or anywhere in between with the click of a button
- Hidden drainage removes water when it's raining to help keep your entertainment area dry
- Bottom pivot louvres help reduce water splash from the gutters when closed.
- Integrate Solarzip™ dropdown awnings to help keep warmth in or light out
- For the ultimate in outdoor rooms, integrate Glaslide® Glass Sliding Doors or Louvelite® 88 Series Shutters to make your outdoor room complete

Choose between Freestanding, Wall Mount, or Fully Integrated series roofs for a truly custom design that suits your home.

Both the **SunFold®** and **SunPivot®** louvre roofs come with a range of features and additional add-ons that help create a bespoke entertainment area that will protect you from the elements and have you enjoying the outdoors in any season.

The louvres can be adjusted to control light and provide shade not only under the roof, but also for adjacent rooms

FREESTANDING

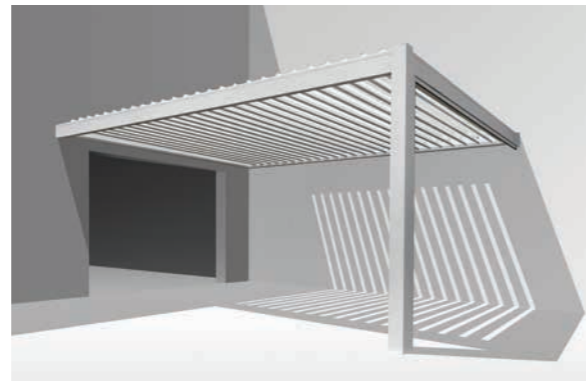

Completely stand alone, a freestanding louvre roof is great to create separate environments away from the home, anywhere in the garden. This is also a great option if attaching or integrating into an existing home is not possible.

FREESTANDING

WALL MOUNTED

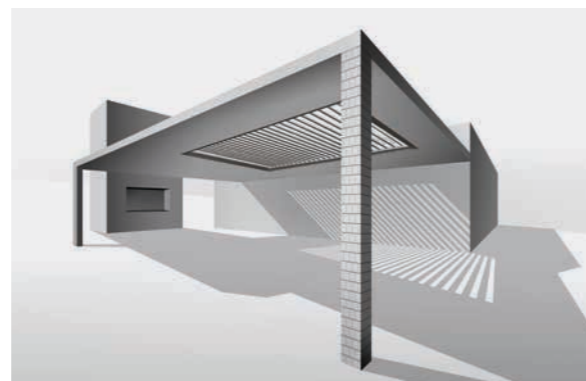

A great solution for extending your living space into your outdoors. Attached to the house along one or more sides, the wall mounted series helps create a seamless transition to outdoor living.

WALL MOUNTED

INTEGRATED

Made to blend beautifully into your home. Our louvre roofs can be fully integrated into a larger roof design to help create stunning indoor-outdoor flow that will have your guests questioning if they are in or out.

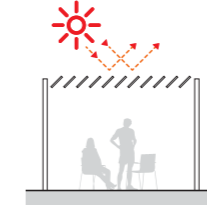

INTEGRATED

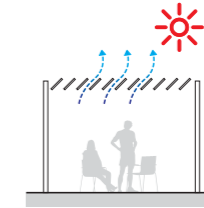

Rain Protection

When closed the roof protects you and your furniture from passing showers.

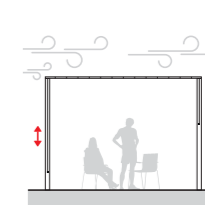

Temperature Control

Manage midday temperatures to enjoy outdoor living during the hottest part of the day.

Ventilation

Allow air to flow - preventing heat build-up and the "glass house effect" of a conservatory.

Wind Control

Drop screens down to provide some shelter from prevailing winds.

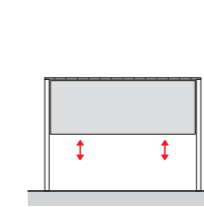

All Weather Protection

The addition of Glaslide® Glass Sliding Doors will help protect you and your outdoor furniture from most weather the environment can throw at you. Spend all year enjoying the outdoors.

Rain Sensors

Optional sensors detect the weather conditions and your Outdoor Living System will adjust automatically.

Privacy Control

Screens add a level of privacy to outdoor living. Extra privacy can be created with the use of drop down screens. On sunny days these can be raised, so that the existing character of your patio remains.

Integrated Lighting

Lighting can be fitted into the outer frame creating an intimate atmosphere and a reason for guests to stay a little longer.

Dulux® Powder Coat Colour Matched to your Décor

Each Outdoor Living System is custom made, including the powder coat finish selection.

Our powder coating is done right here in New Zealand at a state of the art Dulux accredited powder coating facility.

Remote Control

Opening and closing your louvre roof and screens can be easy via the touch of a button on the remote control.

SOLARZIP™ DROPDOWN AWNINGS

Integrated into Louvre Roof beams for a comfortable environment.

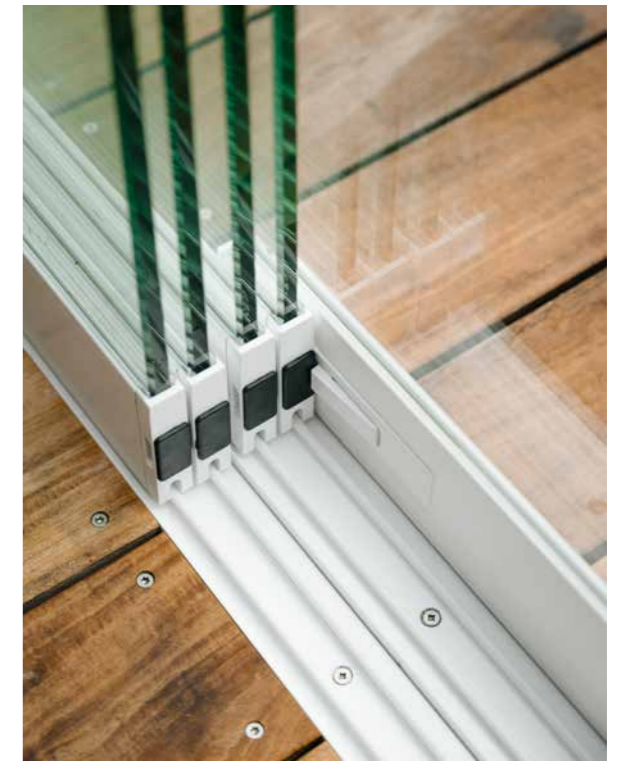

Solarzip™ is a vertical awning system for sheltering outdoor living areas from moderate winds and sun, whilst retaining the view and access to natural light. Installing a Solarzip™ dropdown awning will extend the use you get out of your Outdoor Living Room or pergola, by helping protect you from the elements.

Operated via remote, you can adjust the Solarzip™ awning to suit the conditions without even having to get up.

A special high temperature, welded side zip allows the awning fabric to be encapsulated within aluminium side tracks that blend seamlessly with your Louvre Roof. Patented Solarzip™ technology absorbs fabric movement and helps prevent the fabric from tearing out from the guides.

Features and Benefits

- Integrated into louvre roof beams
- Automated for easy control
- Strong welded side zips keep the fabric within the guide at all times
- Weighted drop bar keeps the awning stable in wind and rain

GLASLIDE® FRAMELESS OUTDOOR SLIDING GLASS PANELS

Glaslide® creates an elegant, protected outdoor room.

Outdoor spaces are increasingly being designed for greater flexibility - for a variety of uses and year-round living. The introduction of Frameless Sliding Glass Panels into an outdoor area creates a unique outdoor space, with the functionality of indoor spaces.

The Glaslide® system comes in a range of glass thicknesses and sizes for various wind zones, helping you keep the weather out. Easily open and slide away with foot operated locks to transform your outdoor room into a light and breezy entertainment area.

Features and Benefits

- Double and triple track options
- Two, three, four and six panel configurations
- Low bottom track, just 22mm
- Opening of glazing space up to 80%
- Foot operated interconnecting locking system
- Maximum panel weight 120 kgs

LOUVRELITE® 88 SERIES SHUTTERS

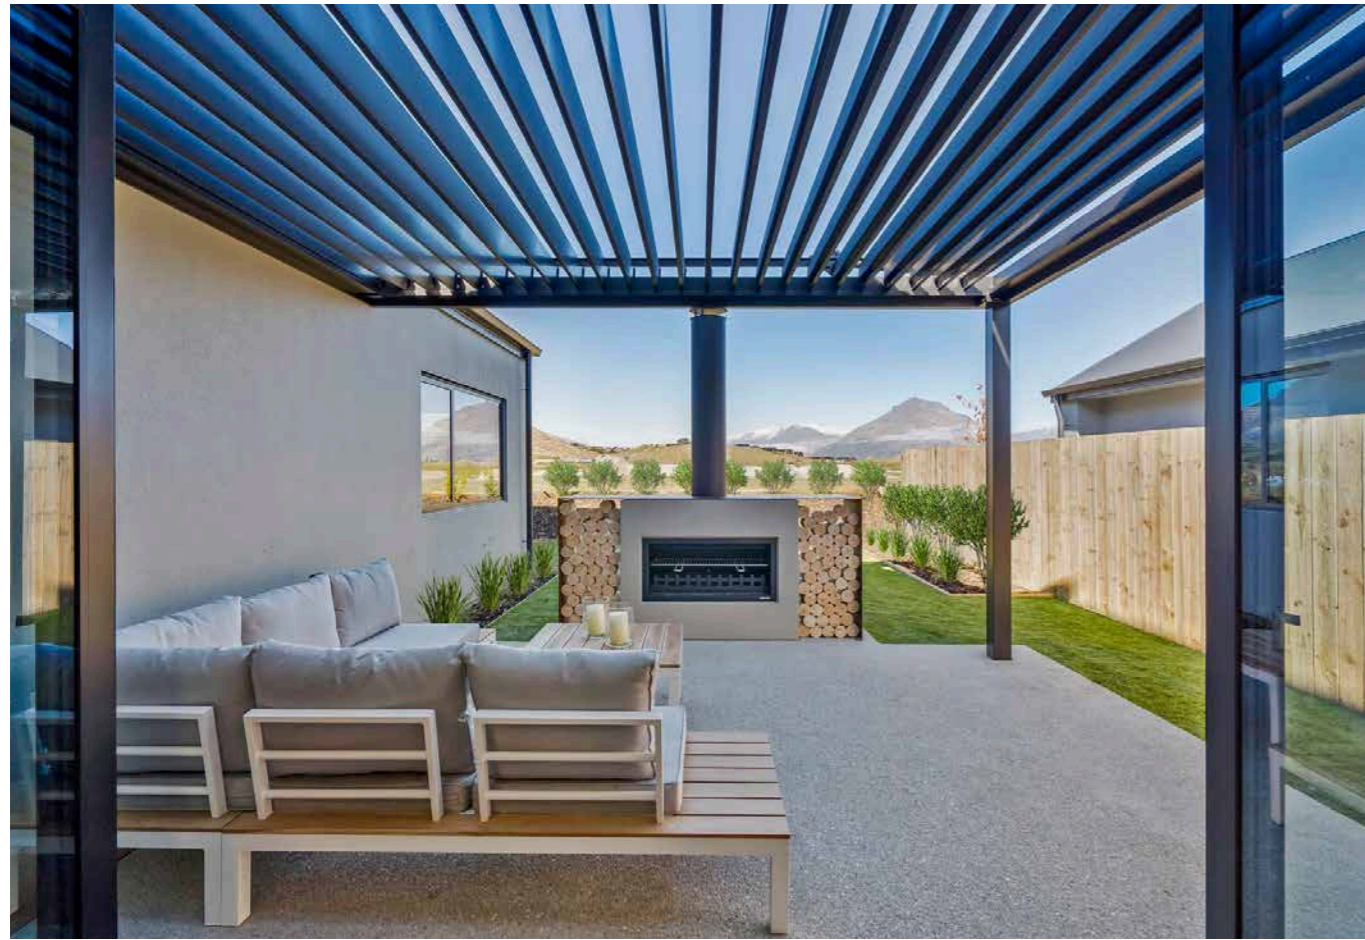

Creating comfortable outdoor environments

The LouvreLite® 88 Series Sliding or Fixed Panel Shutter System provides luxurious appeal and superb environment control in one.

The perfect system for the outdoor entertainment area that provides people with the ability to control how much airflow or light shines through by tilting the louvre system or sliding entire panels around.

Features and Benefits

- Architecturally designed for New Zealand environments
- Made with aluminium and stainless steel for longevity and minimal ongoing maintenance
- Designed for shading outdoor areas, whilst letting in light and breeze
- Powder coated in New Zealand in a choice of modern colours
- Custom made shutters up to max 1500m wide x 2700mm high
- One, two, three or four door shutters configurations available
- Fixed or Sliding options
