

VELASUN® OUTDOOR LIVING SYSTEM

The VelaSun® Outdoor Living System is an ideal solution for extra outdoor shelter for your home.

An elegant Aluminium pergola system designed to shelter your outdoor entertainment area from harsh sun and rain so that you can enjoy the outdoors in perfect comfort.

Available as a roofless pergola, or with **glass** or **polycarbonate** cover to protect you from the elements.

+ ALL WEATHER PROTECTION

The VelaSun® will protect you from all the elements so you can enjoy your outdoor space year-round without worrying about the weather.

+ DURABLE ALUMINIUM FRAME

The robust aluminium frame is built to last, ensuring long-term enjoyment with minimal maintenance and a real value add for your home. The frame can be powder coated in a wide range of colours to blend it with the design of your home.

+ UV-RESISTANT POLYCARBONATE OR GLASS

Choose from polycarbonate with a gentle concave curve on each panel or flat glass. The harsh New Zealand sun is blocked by VelaSun's high quality Italian made **4mm polycarbonate** roofing, keeping you and your loved ones safe and reducing the risk of your outdoor furniture fading.

Glass is also available for those who prefer a glass finish.

+ AESTHETIC APPEAL

The VelaSun® is designed to enhance your outdoor space and create the seamless indoor-outdoor flow we all enjoy.

Our polycarbonate system is designed with a nominal panel width of 800mm, and our glass system is designed with a nominal panel width of 600mm for two differing design appeals.

+ EASY INSTALLATION

The system can be installed on any new build or retrofitted to an existing home with a number of custom solutions provided by our expert installers.

+ VERSATILE DESIGN

Our outdoor living solutions are custom-designed to meet your needs. Get in touch to find out more about sizing, colours, inbuilt lighting, drop-down screens and other add-ons to help create the perfect environment at home.

OUTDOOR LIVING

+ YEAR-ROUND OUTDOOR LIVING

With either polycarbonate or glass, VelaSun® is the perfect fixed canopy for variable New Zealand conditions; protecting you and your guests from sun and rain.

The VelaSun® Outdoor Living System can be designed around your existing home with soffit or wall mounting options, and with a maximum span of 4.8m and length of 12m+, you can cover an amazing amount of your outdoor area.

+ ROOFLESS PERGOLA

The VelaSun® system is highly customizable and can be installed as a traditional Roofless Pergola when minimal weather protection is required and creating a comfortable atmosphere as the focus.

+ ADDITIONAL AWNINGS

Add a Solarzip® drop-down awning to really create a comfortable environment. A drop-down awning can protect you from the wind or sun, and adds a level of privacy to really turn your outdoor area into something special.

Drop-down awnings can be added to both the width and span of your VelaSun®. Talk to your local dealer about options available.
